

Intelligence Bootcamp 2022

Recorded Future is excited to offer the first-ever Intelligence BootCamp by Recorded Future University at Predict22! Join us for an afternoon of fun and enablement exclusively for our clients. Hear from our Training, Support, Community, and Voice of Client teams on the various resources available to you at Recorded Future, followed by three different training tracks to choose from for all experience levels and license types.

Intelligence Camp at Recorded Future University			
1:30-2:30	An Intelligence Services Panel on Client Resources		
2:30-2:45	Break		
2:45-4:30	Getting Started with Recorded Future Live (Beginner/New User)	Geopolitical Intelligence: Micro to Macro (Intermediate/Adv)	The Experts Corner: Supercharging the Timeline (Intermediate/Adv)

Start Here: Recorded Future Resources and You!

With so many Recorded Future resources available to you, it can be overwhelming to know where to start. Join us for a client-exclusive opportunity to learn how you can save time and effort with the enablement tools offered by Recorded Future. Members of our Intelligence Service’s Client Enablement teams will answer your questions and demonstrate how you can lean on these resources to streamline your workflows, level up your expertise, and connect with one another. The best part? All of these are included with your license and available now!

Resources that will be discussed:

- Recorded Future University
- Support Site and Tickets
- In-Platform Support
- Recorded Future Community
- Champion Feedback Group

This session is perfect for all clients of Recorded Future and is not module-specific.

Getting Started with Recorded Future Live

We’re bringing our new user webinar to you in person! This session introduces users to key concepts, terminologies, and functionality within the Recorded Future platform. This session

provides a foundation for continual learning as well as context for the many resources available to users.

The goal of this session is to:

- Define common terms and concepts relevant to Recorded Future
- Explain entities and ontologies
- Describe what watchlists are and how to use them
- Locate additional resources to aid your onboarding

This session is perfect for New Users of Recorded Future or those looking for a refresh. This session is not module specific.

The Expert's Corner: Geopolitical Intelligence - Micro to Macro

Are cyber threats keeping you up at night? Join us for our first ever in-person offering of the Expert's Corner live at Predict! In this session, micro to macro, we walk through monitoring location-based and geopolitically-motivated events at the local and international levels.

Following this session, you'll understand how to:

- Describe the unique features of the Geopolitical Intelligence Module
- Initiate and continue research with the Geopolitical Intelligence Module
- Apply the Geopolitical Intelligence Module to locations you care about
- Understand how to dig into complex international events

This session will be best suited for users with at least 6 months of experience with Recorded Future and have access to the Geopolitical Intelligence Module.

The Expert's Corner: Supercharging the Timeline

Are you looking to improve your visualizations? Join us for a live edition of Supercharging the Timeline, our first ever Expert's Corner, at Predict! In this session you will learn how to effectively utilize the Timeline Visualization & Advanced Query Builder functionality.

At the end of this session you will be able to:

- Leverage the Advanced Query Builder's Multi-Section Query
- Visualize trends in timeline view instead of poring through text in table view
- Export the timeline graphically and add annotations in order to provide the executive board with key information
- Visualize originating context and events of various entities
- Convey investigation findings to stakeholder

This session will be best suited for users with at least 6 months of experience with Recorded Future and have access to the Threat Intelligence Module.
