# How Government Organizations Across the Globe Use Recorded Future's Intelligence

Cyber defense of 30+ countries trust Recorded Future to tackle the most difficult intelligence, security, and risk challenges

## QUICK STATS

### Recorded Future's clients are:

- Cyber defense of 30+ countries
- 150+ global government, defense, intelligence, and law enforcement organizations
- 1,400+ clients globally

Many of the most critical government organization operations rely on intelligence from Recorded Future to protect their digital and physical assets. For the past 13 years, Recorded Future has been working with government clients from countries around the world to manage their risk and proactively protect their organizations from a world of threats. Here are some of the stories of government client's successes with intelligence:

### Identifying Election Threats with Broad Source Coverage & Deep Analysis

A Middle Eastern CERT used **Recorded Future's Advanced Query Builder** to monitor their country's election and build relevant queries to investigate and hunt for threats, enabling them to promptly and appropriately react to the relevant findings.

*Middle Eastern CERT*

### Remediation of Active Cyber Threats Targeting Government Entities

When a large percentage of their staff were impacted by the conti trickbot malspam campaign, Recorded Future **proactively notified** a European Security Organization of the campaign, **allowing the organization to take immediate action over the weekend to remediate the damage.**

*European Security Organization*

### Monitoring War on Ukraine with Finished Intelligence

Recorded Future's geopolitical and cyber Insikt notes have helped a Government Defense Organization **develop situational awareness** and keep relevant stakeholders apprised of the war in Ukraine. Recorded Future's platform has also helped the team to **identify trends and understand border activity**.

*Government Defense Organization*

### Platform & Analyst Support to Achieve Mission Success

A Latin American Defense Organization's technology executives reported that Recorded Future's intelligence is the **most critical intelligence technology they own**. Unlike other intelligence vendors, **Recorded Future has ensured success and technical delivery since the team was first onboarded**.

*Latin American Defense Organization*

### Using Finished Intelligence to Uncover a Government Breach

Recorded Future alerted a European CERT of a major company in their country's compromise and their data being sold online. On their own, the CERT found it challenging to obtain the context they needed on the incident to appropriately protect their country. As a result, **Recorded Future's Insikt Group worked with the organization to provide valuable intelligence on the situation**.

*European CERT*

### Real-Time Vulnerability Monitoring & Prioritization

A Middle Eastern Regulatory Agency **effectively prioritizes vulnerabilities by using Risk Scores** to find the real risk associated with vulnerabilities and determine what most urgently needs to be patched. The organization also reports that **they rely on the Insikt Group's reporting on Advanced Persistent Threats (APTs)** to better understand the threat landscape.

*Middle Eastern Regulatory Agency*

### Proactively Monitoring Third-Party Risk for Government Suppliers

A European Legal Agency uses Third-Party Intelligence to get **a holistic view of their suppliers' risks** to understand how to safeguard their data appropriately. The agency also uses this intelligence to **accurately inform their wider team on their overall third-party risk**.

*European Legal Agency*

### Research from Insikt Group Saves Time Investigating Threat Actors

An Asia Pacific Security Agency noted that the Insikt Group's research has provided a **trustworthy source for investigating threat actors, saving them valuable time and effort**.

*Asia Pacific Security Agency*

## ABOUT RECORDED FUTURE

Recorded Future is the world's largest intelligence company. The Recorded Future Intelligence Platform provides the most complete coverage across adversaries, infrastructure, and targets. By combining persistent and pervasive automated data collection and analytics with human analysis, Recorded Future provides real-time visibility into the vast digital landscape and empowers clients to take proactive action to disrupt adversaries and keep their people, systems, and infrastructure safe. Headquartered in Boston with offices and employees around the world, Recorded Future works with more than 1,300 businesses and government organizations across 60 countries.
