

# Recorded Future Intelligence Cloud Helps You Prepare to Implement DORA Requirements

The Digital Operational Resilience Act (DORA) aims to harmonize the various IT security requirements for the covered entities in the financial sector. It entered into force on 16 January 2023 and is applicable from 17 January 2025 onwards. DORA focuses on digital resilience for covered entities and the information and communication technologies (ICT) that they use:

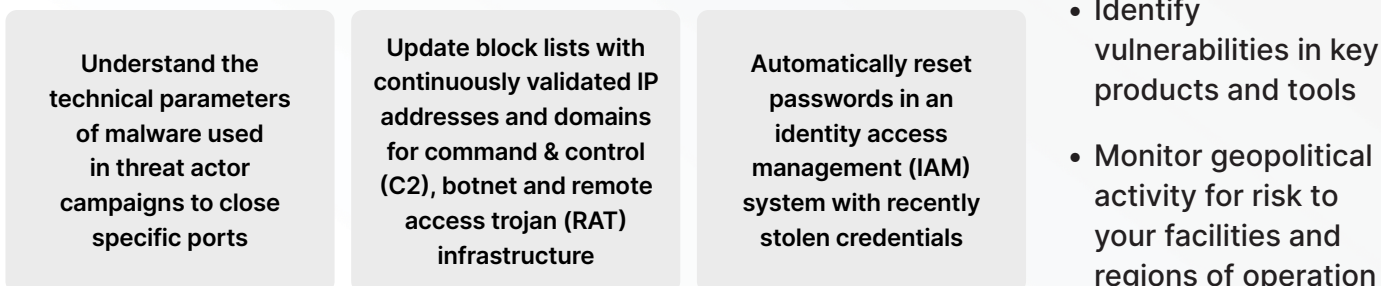

Given that DORA will impact not only financial entities, but also the ICT third-party service providers that they rely on, it's suggested that organizations start preparing for compliance.

## How Can Recorded Future Help?

### 🔍 Gain a complete view of your threat landscape to identify what matters to you

### 🛡️ Implement security controls and make adjustments as necessary

## Mitigate software threats originating from 3rd and 4th party vendors

Enrich vulnerabilities on scanned third-party products with data on weaponization

Dynamic risk scoring for third-parties, updated in real-time

- Detect anomalous behavior with threat intelligence in your security tools

## Detect new threats with context

Receive a notification within minutes of a potential breach impacting a key third-party, such as a database offered for sale

Detect references to your brand and “secret” keywords on ransomware extortion sites to quickly understand the severity of potential leaked documents

- Identify potential risks to ICT tools
- Discover gaps in security controls and identify opportunities for improvement

## Decrease time to respond and report

Equip users with essential information, updated in real time, on their threat landscape

Reduce time spent searching, summarizing, and writing reports by hours

Recorded Future AI answers your questions about threat patterns, implications, and intelligence sources

- Research cyberthreats for to meet incident reporting requirements with real-time intelligence

**Contact us to schedule a discussion on how you can get ahead of DORA and protect your business.**

### ABOUT RECORDED FUTURE

Recorded Future is the world's largest threat intelligence company. Recorded Future's Intelligence Cloud provides end-to-end intelligence across adversaries, infrastructure, and targets. Indexing the internet across the open web, dark web, and technical sources, Recorded Future provides real-time visibility into an expanding attack surface and threat landscape, empowering clients to act with speed and confidence to reduce risk and securely drive business forward. Headquartered in Boston with offices and employees around the world, Recorded Future works with over 1,800 businesses and government organizations across more than 75 countries to provide real-time, unbiased, and actionable intelligence.
