

# Recorded Future and TruSTAR

## PRODUCT OVERVIEW

TruSTAR is an Intelligence Management Platform that helps you operationalize data across tools and teams, helping you prioritize investigations and accelerate incident response. This allows analysts to fully integrate their security technologies, teams, and processes with actionable threat intelligence resulting in reduced detection to response time and enhanced asset protection.

## JOINT INTEGRATION DESCRIPTION

The integration between TruStar and Recorded Future allows users to bring high-fidelity threat intelligence into their workflows to reduce the MTTR (mean time to response). The integration makes use of the following Recorded Future Risk List for correlation and detection:

- IP
- URL
- Hash
- Vulnerability

These datasets contain malicious indicators that can be used for correlation against internal telemetry data.

## CHALLENGES OVERCOME THROUGH INTEGRATION

When security teams don't collaborate and tools don't communicate, critical gaps emerge. By making Recorded Future data available in TruStar, you're able to:

- build processes to identify the most relevant threats, proactively protect your network
- quickly respond to incidents in a measurable way
- ability to layer external threat data on top of internal telemetry data

 Recorded Future®

TRU\*STAR

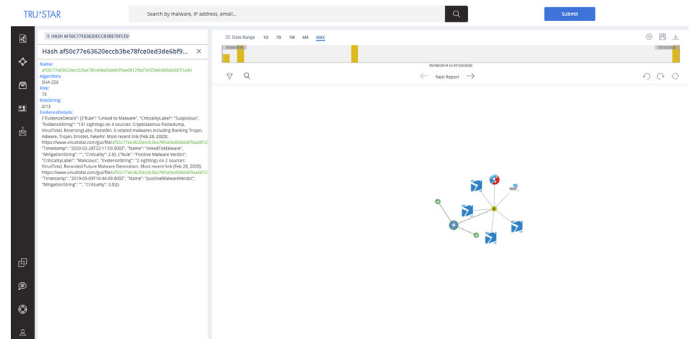

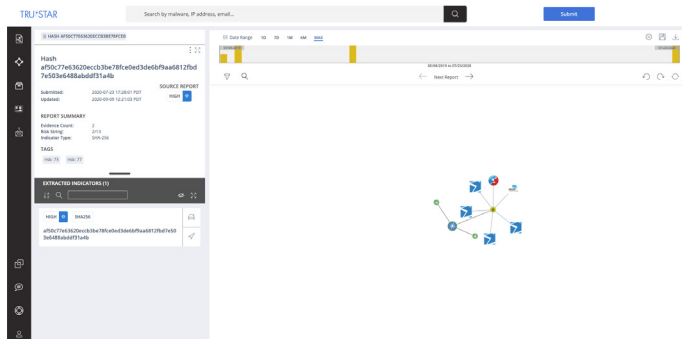

## BENEFITS:

- build processes to identify the most relevant threats, proactively protect your network
- quickly respond to incidents in a measurable way
- ability to layer external threat data on top of internal telemetry data.

## USE CASES

The integration between TruStar and Recorded Future allows security responders to

- Detect and gain context on threats with real-time external intelligence
- Proactively block threats before they impact the business

### About Recorded Future

Recorded Future arms security teams with the only complete threat intelligence solution powered by patented machine learning to lower risk. Our technology automatically collects and analyzes information from an unrivaled breadth of sources and provides invaluable context in real time and packaged for human analysis or integration with security technologies.

### About COMPANY NAME

Our Mission is to build and deliver technology so teams of security professionals can Defend Better Together. We believe that when security professionals can integrate intelligence data into every stage of their workflow, they can make better decisions faster.

Founded in 2014 by a mix of seasoned entrepreneurs, former security and intelligence specialists, and killer product developers, TruSTAR is building a platform that operationalizes internal and external data sources through an ecosystem of integrations to help you gain control of your data.
