

## Results\*

Find threats faster and reduce risk exponentially with Recorded Future's combination of patented machine learning and expert analysis. Access the world's most advanced security intelligence in real time to disrupt adversaries and defend your organization.

### Find Threats 10 Times Faster

Recorded Future's Brand Intelligence Module eliminates alert overload. The module is preloaded with over twenty out-of-the-box alerting queries and prescriptive workflows to surface the most relevant mentions of your brand in real time.

### Respond 63% Sooner

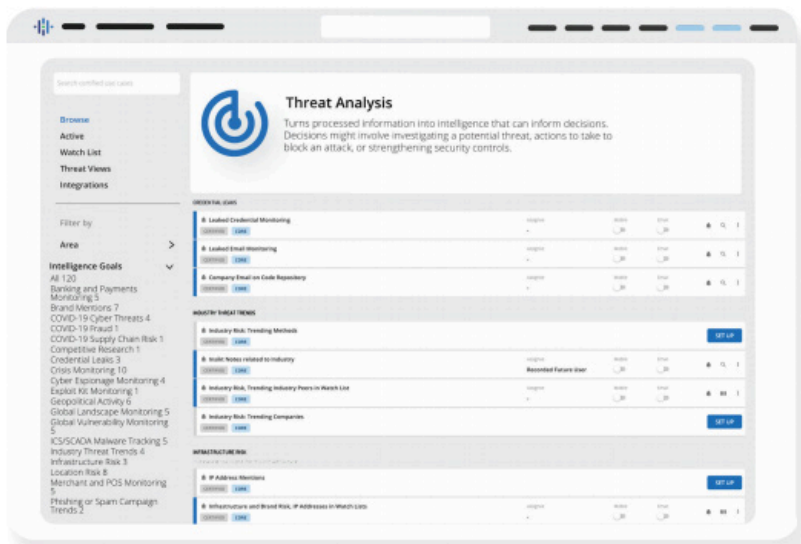

Reduce risk in record time with built-in take down services. Security analysts can identify, report, and initiate take down requests within the Brand Intelligence Module — including instances of domain abuse, malicious mentions of their brand, and more.

## Feature Spotlight: Brand Intelligence for Real-Time Alerting

Search Recorded Future's Intelligence Goals Library for pre-set alerts that are relevant to your organization — and activate them with a single click. Alerting use cases specific to brand protection include:

- Monitoring for cyber events affecting or targetting your brand
- Finding leaked credentials
- Identifying typosquat domains
- Alerting on stolen bank identification numbers

From the Intelligence Goals Library, users can easily activate alerts to monitor their brand, company, products, executives, and domains.
