

Geopolitical Intelligence

Identify and monitor physical threats, geopolitical events, and country risk

Challenge

Trying to keep up and understand the strategic risks associated with operating or conducting business in certain countries presents numerous challenges.

There are cyber, physical, supply chain, and regulatory risks to keep pace with, while access to reliable and up-to-date information, a lack of internal expertise, and resource constraints threaten to hold you back.

Solution

Geopolitical Intelligence provides analysts and leaders up-to-the minute insights into shifting global dynamics so you can protect your people, facilities, and other critical assets.

Map and monitor physical risk to the locations that matter most. Consult country risk profiles so you can keep operations running smoothly and keep traveling employees safe. Stay on top of global events by conducting deep investigations and trend analyses with the world's largest intelligence repository at your fingertips.

Key Benefits

- Form an effective response to events with real-time and accurate alerting on physical risks to key areas of concern for your business.
- Reduce investigation and research time with comprehensive context on global and local events that impact business strategy, operations, or safety.
- Make confident travel decisions and assessments to ensure executives and employees are safe and secure while traveling.
- Take preemptive measures to mitigate risks, enabling business continuity even in volatile environments.

Key Use Cases

- Strategic Intelligence – Understand your risk exposure across the globe and get ahead of the next global event.
- Facility Risk – Identify risk events and risk trends happening around you.
- Travel Risk – Prepare travel risk reports with the most current information on active and impending risk events.
- Executive Protection – Safeguard high-profile individuals, corporate executives, and public figures with real-time geofence alerting and travel risk assessments.

Features

Broad, multi-language source coverage

Geopolitical Intelligence collects global data from across social media, local news, and messaging platforms in numerous languages.

Real-time monitoring and alerting

Get notified immediately about violent crime, protests, disasters, and public safety events. Access helpful context for each event to inform your response.

AI conversations and reporting

Ask Recorded Future AI questions that are top of mind and receive helpful information in seconds. Easily create and schedule reports on specific topics.

Country insights and risk scoring

View helpful insights on what's happening in key countries for your organization across different event types and time ranges. Proprietary risk scoring capabilities provide information on country risk across different factors.

Location-based Intelligence Cards™

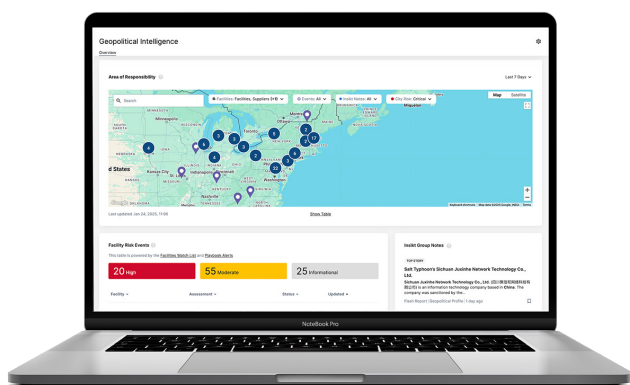

Quickly access risk scoring, events, and trends for specific locations.

Expert analysis

Get in-depth geopolitical research from Recorded Future's Insikt Group, available directly in the product and via exclusive communications.

Professional Support

Access a team of security intelligence experts for onboarding, training, and ongoing support.

"The facility risk playbook alerts have been huge. We can monitor everything from natural disasters to protests in areas with facilities. Recorded Future has broadened our scope/view and gives us the ability to see predicted events before it's too late. Proactive vs reactive!"
