

Intelligence Advisory & Integration Services

Overview

Recorded Future Intelligence Services offers industry-leading expertise to complement our AI-driven Intelligence Cloud Platform. Our global services teams empower organizations to become intelligence-led by advancing their practices no matter where they are in their journey. Our teams offer capabilities for customers to help reduce business risk and transform security operations in order to build greater cyber resilience.

Why Intelligence Advisory & Integration Services?

Our engagements provide expert guidance tailored to each customer's unique needs, helping accelerate implementation and align security efforts with business goals. We support the evolution from tactical threat intelligence to comprehensive security strategies, enhancing resilience and long-term maturity. Intelligence Services offers flexible access to technical and subject matter expertise at any stage of the customer journey, whether just starting out or operating at an advanced level.

How it Works

- Intelligence Advisory and Integration Services use a credit system allowing customers to leverage our experts via a catalogue of engagements
- Engagements are assigned a credit value, which varies based on the length and complexity of the work.
- Each engagement will be reviewed by a subject matter expert in order to deliver maximum value
- Engagement requests are generally assessed within 24 hours; deliverable timing varies based on scoping sessions with the customer
- To the extent appropriate, Recorded Future will provide a deliverable at the conclusion of the service, summarizing the work and outcomes

Tactical	Operational	Strategic
 Reduce cyber risk and enhance your organization's security posture	 Develop best practices for consuming, analyzing, and applying cyber threat intelligence	 Establish standardized, measurable processes for collecting, analyzing, and sharing intelligence across your organization
Security Operations Use Case Development	Solutions Architecture Review	Threat Reporting Workshop

The above are a sampling of available offerings. Bespoke engagements can be designed to assist your team as well.

Our Teams

Advisory Services

Our Advisory Services team supports the evolution of your intelligence program by designing customized workflows, delivering hands-on workshops, and teaching intelligence tradecraft, all while optimizing the use of Recorded Future technologies.

Integration Services

Our Integrations Services team maximizes the effectiveness of your automated intelligence workflows, ensuring seamless integration across your enterprise. By identifying new use cases, optimizing existing ones, and engineering custom solutions, we meet your evolving needs and empower your organization with streamlined automation.

Intelligence Services In Action for Ransomware Mitigation

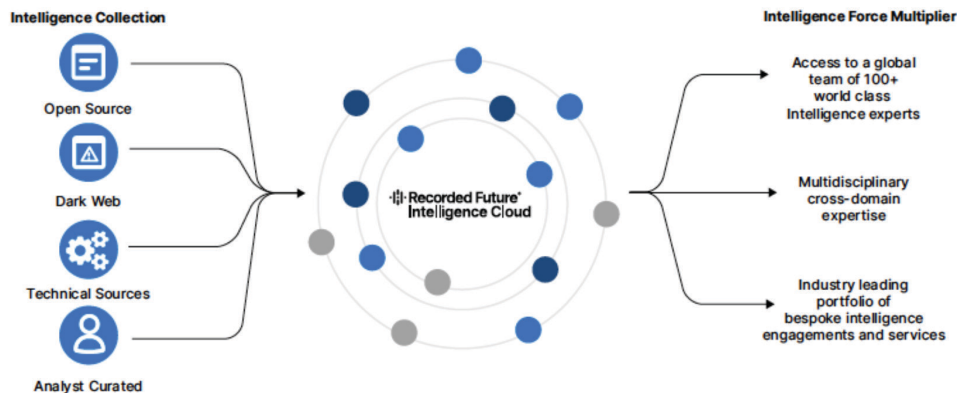

- Use Case Automation for ransomware specific threat detections
- Workshops for identifying changes to Initial Access TTPs
- Threat Actor Profiling specific to your business and a spotlight on ransomware actors.

“Recorded Future is our trusted partner that we can rely on to support our cybersecurity strategy. Their superior support including their intelligence services team and customer service really set them apart from their competitors. It’s been a totally positive experience working with them and we will absolutely continue with this strategic partnership in the future.”
