Recorded Future®

Recorded Future Managed Intelligence and Response

Extend and Enhance Your Security Team

Challenge

As the attack surface grows and adversaries attempt to exploit every possible weakness, security teams are often overwhelmed struggling to manage more and more vulnerabilities and security alerts. With too little time and not enough information, it's difficult to determine where to focus precious resources. Analysts should be spending their valuable time addressing priority security risks and not searching for information on the open and dark web, only to find incomplete pieces of what they need — ultimately resulting in missed threats and slower responses.

The Recorded Future Solution

The Recorded Future Managed Services team enhances your security team to keep your business running smoothly. As an extension of your team, we partner closely to foster trust and transparency, and help grow and mature your security program as you deem necessary.

The Recorded Future team enables security operations and incident response teams to identify previously unknown threats and respond confidently — without the need for manual research. This is accomplished with the Recorded Future Intelligence Platform whereby the collection, analysis, and production of intelligence is automated from an unrivaled range of open source, dark web, and technical sources, and combined with world-class human based research to drive accelerated remediation. This approach produces intelligence at massive scale, and is integrated directly with your security team workflows and the tools they use for more effective alert triage and smarter threat detection use cases.

Our team of skilled and experienced analysts will work alongside your security teams to help manage, monitor, triage and respond to alerts for threats or vulnerabilities which are specific to your organization and IT environment. Learn how the Recorded Future Service team can assist your security team and help you stay one step ahead of adversaries.

KEY FEATURES

World-class threat analysts extend and enhance your team:
- Tailored use case definition and defined outcomes
- Alert triage and incident response
- Managed response services

Service levels to fit your needs and budget:
- Daily incident escalations

Workflows seamlessly integrated into existing processes and tools:
- Incident management and messaging system
- Recorded Future Intelligence Platform
- Email

BENEFITS
- Access to experienced threat response analysts
- Identify and mitigate threats faster with less resources
- Immediate time to value leveraging best practices and industry expertise
- Validated incident escalations with no alert fatigue
- A fully managed intelligence platform to minimize digital risk

Features of Managed Services Offered

MANAGED BRAND INTELLIGENCE: Protect your reputation and brand. Ensure everything that makes up your brand; your products, employees, executives and customers are safe from external threat actors looking to steal or tarnish your digital footprint.

- Data and credential leak monitoring
- Executive protection from doxxing to impersonation
- Phishing and fraudulent site detection
- Dark web monitoring / compromised asset detection
- Code repository / paste site monitoring
- App store and messaging platform monitoring
- Takedown services*
- Dark web marketplace purchases and threat actor engagements*

*Available as add-on services

MANAGED THREAT AND VULNERABILITY INTELLIGENCE: Stay ahead of adversaries with real-time intelligence. We will do the work to provide you with prioritized intelligence delivery so your security team can take action to mitigate threats before damage can be done.

- Ransomware threat monitoring
- Crime or fraud threat actor monitoring
- Threat Actor and TTP monitoring
- Detection & hunting packages delivery
- Industry / peer threat analysis and monitoring
- Vulnerability prioritization and exploitation likelihood analysis
- Threat actor and malware attribution to vulnerability and misconfigurations

MANAGED THIRD PARTY INTELLIGENCE: Eliminate third party risk. Our team delivers actionable findings and intelligence to your Third Party Risk, GRC and Threat Intelligence Teams to protect your organization from threats and operational risk stemming from vendors and suppliers.

- High risk vendor detection and response
- Supplier breach and disruption monitoring
- Supplier data leakage by ransomware detection
- Company and data curation management
- Third party violation and executive reporting templates
