

Third-Party Intelligence Module

Visibility, Automation, and Evidence for Action

Challenge

As organizations evolve and embrace new technologies and processes to become more efficient, innovative, and competitive, their third-party ecosystems continue to grow.

Vendors, suppliers, partners, contractors, and resellers all add value to the business — but they also introduce risk. All third-party companies face their own cyber risk, and these risks are also assumed by the companies they work with. When these risks are not acknowledged and mitigated, your own business may be subject to unintended damage as a result. In fact, nearly [60% of companies](#) have suffered data breaches stemming from a third-party relationship.

Solution

Recorded Future's Third-Party Intelligence module provides a real-time view of the cyber risks their third parties face. Comprehensive security intelligence empowers teams to understand, analyze, and take action against potential risks by monitoring for key indicators including data leakage, incident reports, domain abuse, email security, vulnerable infrastructure, web application security, dark web attention, and more.

The Recorded Future Security Intelligence Platform uses patented machine learning and natural language processing to automatically collect and analyze information from more than 750,000 technical, open web, and dark web sources. The platform provides quantifiable risk scores that represent the risk and security postures for the companies in your third-party ecosystem. These risk scores are grouped into 3 categories: high, moderate, and informational, and they are comprised of nearly 40 risk rules monitoring vital security control performance indicators.

Recorded Future delivers the most comprehensive view of third parties for these key use cases:

Continuous Third-Party Risk Management: Constantly monitor for risk events for each third party and receive risk-prioritized alerts in real time. You'll immediately know about new risks and their severity, and you'll have the context and evidence you need to address threats quickly and confidently.

Procurement Assessment: Access more than 150,000 company Intelligence Cards™ with current and historic risk profiles for a complete picture of your risk landscape that empowers you to rapidly identify third-party risk issues. Recorded Future enhances third-party risk questionnaires to save you time by focusing efforts on automatically identified areas of concern.

BENEFITS:

- Gain a real-time, objective view of your third-party's risk profiles
- Identify more third-party risks before they impact your organization
- Respond quickly with the detailed evidence required to understand and act on risk events
- Improve cross-team efficiency

"Recorded Future has helped us better prioritize third-party risk information and incorporate that into our broader cyber threat intelligence perspective."

Key Features

Recorded Future's Third-Party Intelligence module includes the following key features:

Continuous monitoring of more than 150,000 companies with real-time risk scoring and alerting

Human-curated analysis on major risk events by Insikt Group, Recorded Future's world-class research team

Transparent context into source evidence for deep analysis and fast remediation

The screenshot shows a company profile for 'Statebacked' with a risk score of 88 (High Risk Score). It lists 15 Insikt Group Notes, 10,000,000+ references, and 18 of 33 risk rules triggered. A 'TRIGGERED RISK RULES' chart shows risk levels over time. Below the chart, several risk rules are listed, such as 'Recent Single-Document Email Address Exposure' and 'High Volume of Exposed Credentials'.

Unlimited company lookups included with purchase

Historical context and peer comparison on each company's risk score over the past year

Dark web coverage of closed-access forums for data and credential leak monitoring

Results

Intelligence for a Proactive Approach to Mitigating Risk with Continuous, Real-Time Monitoring

Questionnaire-based approaches to third-party risk are valuable, but these static assessments capture just a single point in time and are prone to error. Stay informed about your third parties constantly with proactive third-party intelligence.

Complete Risk Assessments 50% Faster

Contextual, real-time security intelligence on third parties empowers third-party risk teams to make fast, informed decisions. Transparent context and access to the evidence behind triggered risk rules enable you to quickly remediate risk and confidently move forward with your high-value third-party relationships.

About Recorded Future

Recorded Future delivers security intelligence to amplify the effectiveness of security and IT teams by informing decisions in real time with contextual, actionable intelligence. By analyzing data from open, dark, and proprietary sources, Recorded Future offers a singular, integration-ready view of threat information, risks to digital brand, vulnerabilities, third-party risk, geopolitical risk, and more.
