Recorded Future and D3 Security

PRODUCT OVERVIEW

D3 NextGen SOAR with MITRE ATT&CK is the industry's #1 vendor-agnostic security orchestration, automation, and response (SOAR) platform with 300+ integrations, low-code/no-code playbooks, and automated correlation of attacker techniques. Enterprise and MSSP SOCs around the world use NextGen SOAR to strengthen their security posture, validate threats, and systematically disrupt the kill chain.

JOINT INTEGRATION DESCRIPTION

D3 has an extensive list of Recorded Future commands to retrieve information including:

- Alert notifications
- Risk lists for vulnerabilities, domains, hashes, IPs, and URLs
- Individual or bulk lookups of vulnerabilities, domains, hashes, IPs, and URLs

The integration eliminates manual processing and improves response time by positioning Recorded Future's Threat Intelligence, Alerts, and Analyst Notes into NextGen SOAR's playbooks and MITRE ATT&CK/TTP Monitor.

CHALLENGES OVERCOME THROUGH INTEGRATION

- Block threats quickly and confidently
- Identify and manage risky IOCs
- Do more enrichment and triage with less SOC resources
- Improve the speed of searching and investigation
- Dramatically improve visibility of threat actors and their methods

USE CASES

- Seamlessly enrich events from across your security infrastructure with Recorded Future intelligence to immediately assess risk without manual lookups or screen switching.
- D3 can query Recorded Future for vulnerability intelligence and then trigger a playbook to manage outstanding vulnerabilities.
- Reduce threat detection and prevention time by up to 93% with automated response. D3 can ingest Recorded Future alerts, extract IOCs, and orchestrate the appropriate response, such as blocking IPs and URLs, scanning for malware, and quarantining affected endpoints.

BENEFITS:

- Alert notifications
- Risk lists for vulnerabilities, domains, hashes, IPs, and URLs
- Individual or bulk lookups of vulnerabilities, domains, hashes, IPs, and URLs
About Recorded Future

Recorded Future arms security teams with the only complete threat intelligence solution powered by patented machine learning to lower risk. Our technology automatically collects and analyzes information from an unrivaled breadth of sources and provides invaluable context in real time and packaged for human analysis or integration with security technologies.
